## **DETAILED ACTION**

### ***Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING (S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as **"means"** and **"said,"** should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, **"The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes,"** etc.

### ***Claim Objections***

2. Claims 1-13 are objected to because of the following informalities: claim 1, line 9, "the or said" should be inserted before "control" so as to make use of the antecedent in line 4. Claim 2, lines 1-2, "wherein it includes" should be replaced by "further comprising"; line 2, "capable of" should be replaced by "for". Claim 3, line 3 recites the limitation "each transmitting satellite" however, there is no previous recitation to "a plurality of transmitting satellites". Claim 4, line 2-3, "capable of" should be replaced by "for". Claim 5, lines 4-5 recite the limitation "each code generator". However, there is no limitation to "a plurality of code generator". Claim 8, lines 2-3, recites "a second pseudo random". However, there is no limitation to "a first". Claim 10, line 4, what does it mean by "allowing the supply"? Claim 11, line 2, recites "each channel" however, there is no limitation to "a plurality of channels". The same comment applies to claim 12. Claim 12, line 3, "able to be" needs to be deleted.

Note that any claim whose base claim is objected is likewise objected.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation “such as” recited in claim 7, line 7, renders the claim vague and indefinite. Claim 8, lines 1-2, the limitation “the microprocessor means” lacks of proper antecedent basis; line 3, the limitation “ the pre-detection element integration duration” lacks of proper antecedent basis.

As per claim 9, the limitation “such a recited in line 3 and 6, renders the claim vague and indefinite.

Claim 11, lines 3, “the digital signals” and “all the synchronization tasks” lack of proper antecedent basis.

Claim 12, line 3, “the microprocessor means” lacks of proper antecedent basis.

Claim 13, lines 1-2, the limitation “all the elements” is vague and indefinite; line 2, “such as” renders the claim vague and indefinite. Note that any claim whose base claim is rejected is likewise rejected.

***Allowable Subject Matter***

5. Claims 1-6 would be allowable if amended to overcome the objection sets forth above.

Claims 7-13 would be allowable if amended to overcome the rejection sets forth above.
